

Summary

Senior product designer with 6+ years shipping AI-powered products at companies like Webflow and Optimizely. Grounds design in deep problem understanding, using AI-assisted prototyping to surface insights we couldn't reach with traditional workflows. Systems thinker who has owned complex technical features from 0 to launch.

Work experience

Webflow | Senior Product Designer

Los Angeles, CA | October 2024 - May 2026

- Took AEO Analytics from 0 to GA launch in 6 months as the company's top priority, contributing to a \$1.3M enterprise deal during beta
- Prototyped in Cursor and Claude Code rather than Figma alone — enabling faster customer feedback loops and giving engineering a clear interaction reference that reduced handoff gaps
- Collaborated with two parallel AEO workstreams, sharing work iteratively to surface cross-team dependencies before they became blockers
- Designed AI-powered copy variation suggestions for Webflow Optimize, unblocking users stuck at the ideation phase and driving a measurable increase in experiments created — laying the foundation for future AI-generated image and interaction variations

Optimizely | Senior Product Designer

Los Angeles, CA | December 2021 - September 2024

- Increased feature adoption 2x by introducing an AI-powered ideation feature that helped users generate higher-quality experiment ideas faster
- Extended the existing design system with an AI component library, establishing reusable patterns now adopted across multiple Optimizely products

IBM | UX Designer

Los Angeles, CA | May 2021 - Dec 2021

- Led design thinking workshops with clients to identify pain points in their process, introducing IBM's automation features to solve their problems

Core Digital Media | UX Designer

Playa Vista, CA | May 2020 - May 2021

- Conducted UX research to understand how users utilize the company's mortgage lender search tool and implemented changes based on the research, resulting in a 30% increase in the site's revenue per visitor

Skills	Tools	Education
User research, prototyping, front-end coding, AI-assisted prototyping	Figma, Figjam, Cursor, Claude Code, HTML & CSS, Github, Jira	University of Washington - Bachelor's in Business UCLA Extension - User Experience certificate
